

# TEST PLAN

**Introduction:** This document aims at describing the approach and test process of a manual procedure to be executed in a web application.

**Application Under Test (AUT):** QuintoAndar (<https://www.quintoandar.com.br/>)

**AUT's description:** QuintoAndar is a real state company created to guide users in a practical, safe and fast way to rent and buy houses in Brazil.

## Features to be tested:

- Search for places to rent
- Use of filters
- Schedule visit

## Approach:

- Manual testing will be performed using specified test cases
- the Boundary Value Analysis technique will be used for testing numeric filters
- All the pages under test will be tested using a contrast checker for visual usability matters
- 15 minutes of exploratory testing to experience the website

## Deliverables:

- Test plan
- Test cases
- Report

## Environment:

- Google Chrome v.94
- Firefox v.93
